

Outline

The AI-generated section tree. Each node carries a purple AI chip; a human edit clears it. Re-suggest regenerates only untouched nodes. The blocked state names the gate and links back to it.

2a Generated tree — AI chips, one human-renamed node Section 03 was renamed by hand, so its AI chip is cleared and marked "Edited". Re-suggest leaves it untouched.

Proposal outline

+ Add section

7 sections drafted from your intake. Rename, reorder, or add sections — then continue.

⋮

01

Executive Summary

+ AI

⋮

One-page synthesis of the challenge, approach, and outcome for Dana Ruiz.

⋮

02

Understanding Your Challenges

+ AI

⋮

Name the reconciliation drag and its operational cost in their words.

⋮

03

Our Approach to Dispatch Consolidation

✍ Edited

⋮

Renamed from "Proposed Solution". Re-suggest won't overwrite this node.

⋮

04

Implementation & Rollout

+ AI

⋮

Phased path to production that respects existing EDI and telematics.

⋮

05

Commercial Terms

+ AI

⋮

Pricing model, term, and what's included at each phase.
