

Review

Run the evaluator, work through findings, resolve by re-running. Findings group by kind with one action each — "Go to fix" — that opens the drafting canvas at the anchored node. Findings clear by re-running, not manual dismissal; a "resolved since last run" count shows progress.

5a Pre-run — Run evaluation The AI evaluation is the primary action on entry (gradient, purple). Continue to export is locked until a report exists.

Run the evaluation

The evaluator snapshots the proposal and checks every claim, theme, and section for unsupported claims, repetition, theme gaps, and coherence. You review the findings and fix them in the canvas.

Run evaluation

Takes about a minute. You can keep working — it runs on a snapshot.

5b Findings — grouped by kind, one "Go to fix" hover Filter chips by kind; each finding shows severity, an excerpt, and one action. The top finding is shown in its hover state.

8 findings to review

Last run just now - snapshot of 7 sections. Fix in the canvas, then re-run to clear.

All: 8 Unsupported claims - 3 Repetition - 2 Theme gaps - 2 Coherence - 1

UNSUPPORTED CLAIMS 3

Understanding Your Challenges High "...the wait for load assignment stretches well past your service target" has no supporting evidence in the library. Go to fix →

Our Approach to Dispatch Consolidation Medium "cutting manual reconciliation by an average of 40%" cites a stale passage — the claim was edited after verification. Go to fix →

Proof & Case Studies Low "two dispatchers freed for exception handling" quotes the source loosely — tighten to match the passage. Go to fix →

THEME GAPS 2

Commercial Terms Medium The "dedicated onboarding lead" discriminator never appears in this section, though it's in scope for it. Go to fix →

Why Partner With Us Low No ghost theme is expressed here; the incumbent-doubt angle is missing. Go to fix →

Show repetition & coherence (3) ▾

5c After a re-run — resolved-since-last-run count Findings clear by re-running. A calm green banner shows how many resolved; fewer findings remain.

4 findings resolved since last run

Re-ran just now - 3 remaining, none high severity. Findings clear when you fix and re-run.

3 findings remaining

You can fix these too, or continue to export and confirm the remaining items there.

All: 3 Unsupported claims - 1 Repetition - 1 Theme gaps - 1

UNSUPPORTED CLAIMS 1

Proof & Case Studies Low "two dispatchers freed for exception handling" quotes the source loosely — tighten to match the passage. Go to fix →
