

Themes

AI-drafted win themes, discriminators, and ghost themes — editable rows grouped by kind, each with the purple AI chip that clears on edit. Locking is one set-level action and the first hard gate; the confirmation states that locked themes shape every AI draft.

3a **Drafted themes — grouped by kind, one human-edited row** The second discriminator was edited by hand, so its AI chip is cleared. Re-suggest adds new drafts, never replacing it.

Win themes & discriminators

Edit any row to make it yours. Once locked, these shape every AI draft. This is a hard gate — you can unlock before drafting begins.

WIN THEMES

Why they should act now

+ AI

Scope: Whole proposal

One workspace ends the three-system reconciliation drag

Consolidating dispatch, telematics, and billing is the fastest lever on turnaround time.

+ AI

Scope: 2 sections

Live six weeks without touching your EDI connections

Low-risk, phased rollout de-risks the switch for a lean dispatch team.

DISCRIMINATORS

Why us over the alternatives

+ AI

Scope: Whole proposal

A dedicated onboarding lead through go-live

Named human support, not a ticket queue — directly answers their incumbent frustration.

Edited

Scope: 1 section

Purpose-built for mid-market carriers, not enterprise retrofits

Edited to match Dana's language. Re-suggest won't overwrite this row.

GHOST THEMES

Quiet doubts about the incumbent

+ AI

Scope: Whole proposal

Ask how long a support ticket really takes to resolve

Reframes their renewal decision around the pain they already named.

3b **Lock confirmation** First hard gate. The confirmation states that locked themes shape every AI draft and that unlock is free until drafting begins.

Lock these 5 themes?

Locked themes shape every AI draft in this proposal. Drafting starts as soon as you lock.

Unlock is free until drafting begins. After drafts exist, changing themes needs a redraft to take effect.
